Thanks!

- I've enjoyed chatting with you this semester
- Feel free to mail me anytime (next year, whenever) if there's relevant stuff with which I can help or you just want to ask something

Attendance marks as of 2024-11-18 (with some sessions and absences still to include)

Sorry!

- I hope you enjoyed the module, learned stuff and aren't too depressed about it all
- I'm really sorry that the technical community of which I've been part has produced this crap surveillance capitalism stuff
- I also hope it annoys you sufficiently that you think about how to do something more about it

Do Stuff!

- There are alternative tools and practices you can adopt with not too much work – do that! You are not at all near helpless!
- It's entirely ok that you don't try fix everything at once – as your interests and priorities change, figure out how you want to change your interactions with technology and the Internet
- And remember: you do have rights you can exercise that aren't much work

Feedback

- If we've time...
 - What'd you take from the module?
 - What could've been better?
 - What was missing?
 - Was there too much of something?
- There is a TCD feedback survey or something for electives, apparently you got an email about that
 - I do look at those results, but find 'em hard to interpret being from a self-selecting and typically tiny subset of this already self-selected set;-)
- Or, just send me mail (before or after you get your marks are both fine:-)
